

MENIFEE VALLEY AMATEUR RADIO CLUB

REPEATER LISTING

Background

This list was prepared by first obtaining the complete repeater listings from both the Two Meter Area Spectrum Management Association (TASMA) and the Southern California Repeater and Remote Base Association (SCRRBA). A test was conducted from Point 2250 in Sun City using a 5W handheld and a “rubber duck” antenna to see which stations were accessible.

The result was a list of all repeaters that can be accessed from a good location using modest equipment. Some of the listed repeaters will be useful from your home location, and nearly all of them will be useful when traveling with a mobile or handheld transceiver.

Suggestions for Use

- Determine which repeaters are in range of your home station.
- Program those repeaters into your base station, mobile, and handheld.
- Using additional channels, program the rest of the repeaters into your mobile and handheld transceivers.

2 METER REPEATERS

| 2M Repeaters | | | | | | |
|--------------|---------|------------|---------|-------|------------------------|----------|
| Call Sign | Output | Offset MHz | Input | Tone | Location | Vicinity |
| W6COH | 144.505 | 0.600 | 145.105 | 100.0 | Hemet | Local |
| W6CDW | 144.895 | 0.600 | 145.495 | 156.7 | Elsinore Peak | Local |
| KI6ITV | 145.400 | -0.600 | 144.800 | 146.2 | Wildomar | Local |
| N7OD | 145.420 | -0.600 | 144.820 | 88.5 | Hemet Hospital | Local |
