

**OASIS EMCOMM RADIO GROUP**  
**NET CONTROL STATION (NCS)**

QST, QST, QST, this is the Oasis Community Emergency Communications Net.

This net meets weekly on Tuesday's at 1630 hours, local time, on 146.490 MHz simplex.

The purpose of this net is to establish a pool of trained radio operators for emergency communications that will benefit the Oasis Community's disaster response.

Today is (Month) (Day) (Year) and the time is (Time... use military time, i.e 1630).

Your net control station tonight is \_\_\_\_\_ (name and call sign)\_\_\_\_\_

I am located in the Oasis Clubhouse (or wherever).

This is a directed net, meaning that all traffic will go through the Net Control Station.

The net will now stand by for any Emergency, Priority, or Time Value Traffic.

(Pause, if any traffic, handle it promptly)

The net control will now call for member check in, followed by a request for guest stations to check in.

Please wait until you are called.

When responding to the check in call, please use your name and full call. If you have traffic for the net, just say the word "traffic" and I will get your traffic after initial check in. Wait until you are called.

(Note: Following member check in ask for guest stations)

Any guest stations, please call now.

(Note and acknowledge all quests; thank them for checking in and invite them back, ask for their inputs).

(Call back any traffic from members and quests, hand the traffic)

Are there any late check ins, call now?

Is there any more traffic, or comments?

(At this point it is encouraged that the net controller for that night introduce a topic of their choosing, it can be any topic they want, except for politics or religion.)

If no further traffic, I will now secure this net and return the frequency to normal amateur use. \_\_\_\_\_; net control station for the Oasis Emergency Radio Group Net.

“73” This is \_\_\_\_ (Call sign) \_\_\_\_\_ clear.
